

# Competency Navigator

Our premier product the Competency Navigator is used In Skills Stores. It facilitates solution focused careers guidance by matching a client's skills to qualifications across numerous industries. The Competency Navigator also generates matching qualifications and recognition of prior learning evidence gathering reports. These help clients fast track through the recognition of prior learning process.

## Example of a Competency Navigator Web Interface

The Competency Navigator database is underpinned by over:

- 30,000 national competency units
- 100,000 elements of competency
- 3,000 qualifications
- 2,000 occupations

The Competency Navigator also contains performance criteria, skills and knowledge as well as evidence requirements to support recognition of prior learning for a range of popular qualifications.

The Competency Navigator can be customised to meet your skill assessment needs. The screen shots below show the many faces of the Competency Navigator.
